

2018 TWENTY-EIGHTH PROFESSIONAL SEMINAR VIDEO PRESENTATIONS

Many of the presentations given at this seminar were preserved as video files. To view these presentations, click on the links in the Details section below.

2018 State of the Institute (30:23)

TMI Executive Director and President Nancy (Scooter) McMoneagle addresses the 28th Professional Seminar, an invitational event of The Monroe Institute. Speaking to a familiar audience of Professional Division members, Board members, and special guests, McMoneagle reports on the achievements in research and education since the 27th Seminar, and shares some of TMI's vision for the future.

Nancy McMoneagle offers an update on all things TMI, looking at the accomplishments the Institute has enjoyed as well as some exciting events on the horizon.

Keynote Address: Exploring Sacred Sites (1:20:10)

In his keynote address at the TMI 2018 Professional Seminar, John Van Auken, PhD, leads a mystical, metaphysical tour of ancient spiritual sites around the world. John recounts curious tales concerning the inhabitants of these sites and their reasons for building them and how our own souls were involved with these sites prior to this incarnation. The tour includes temples, pyramids, and legends from sites worldwide.

Mind Mirror Reveals Expanded Consciousness States (1:18:27)

In her presentation, "Mind Mirror: Journey to Happiness," Judith Pennington discusses the brainwave map of consciousness associated with Awakened Mind meditation training on the Mind Mirror EEG. She will lead you through the self-discovery meditation used for opening baseline measurements taken at The Monroe Institute during two Discovery programs in 2017.

Judith shares the extraordinary Mind Mirror patterns produced by program participants listening to HemiSync® and SAM exercises. You will see why the collaboration between TMI and the Mind Mirror is helping participants while contributing exciting discoveries to the field of consciousness research.

Monroe, Sound, and Consciousness (1:00:03)

All things in the universe are created and function through vibration, from the tiniest atomic particle to a galaxy, from a small cell to a body. All things that vibrate emit sound and vibrate at specific frequencies. Sound has a strong and powerful impact upon matter. It affects every

aspect of our lives from the day we are conceived. It is no wonder that Robert Monroe, as many wise men before him, utilized this vehicle to explore consciousness and to help in the *evolution of mankind*. In this presentation, Carmen Montoto helps us to explore diverse aspects and uses of sound through history.

Mystery & Visionary Solutions (1:19:58)

Attendees were treated to a unique, spicy, and powerful presentation by Caroline Casey at the 2018 Professional Seminar at The Monroe Institute.

Self-described as an Astro* mythological *political* guiding *meta-story-teller, Caroline Casey is dedicated to "Liberating Esoterica, translated into accessible vernacular and spiraled forth into the memosphere of cultural influence," in myriad venues. Her radio Show of 22+ years, The Visionary Activist Show, weds "Trickster Magic with ingenious social action, with the objectives that we all be solutionaries."

Journey to the Center (45:12)

You may recall that the forbidden tree of knowledge was placed in the midst of the Garden of Bliss. What does it mean to come to the center of things? Where is the center located? What are the potential rewards and risks of making that journey—or refusing to? These are the questions that Dr. Joe Felser addresses as he takes viewers on an adventure of inquiry into the perennial human quest for the center.

2018 TMI Professional Seminar: In Brief - Monroe Institute Board Members Report (10:46)

In this short, informal briefing at the 2018 Professional Seminar, two of The Monroe Institute's Board of Directors members report on the status and objectives of the Board.

Rhine: Oldest Parapsychology Lab in USA (54:33)

John Kruth, executive director of the Rhine Research Center, presented at The Monroe Institute Professional Seminar on "The Power of Place: Studies at the Rhine Research Center."

The Rhine is the oldest operating parapsychology lab in the country. The first academic lab to develop a formal method for examining psi phenomena, the Rhine became an important destination for people experiencing psi or who were interested in exploring psi phenomena through the lens of science.

In this talk, John gives an overview of ongoing research at the Rhine including projects that reveal how location and place might be developed or hold information that will influence future psi activity at that site.

Research Perspectives (Ross Dunseath) (44:53)

Research is ramping up at TMI, with several active studies underway in the past year. Ross Dunseath, PhD, Research Coordinator at the Institute, reports on the progress of three of these studies, with data and preliminary results. Plans for research in 2018 will be discussed as well.

TMI presents a great opportunity for research in consciousness and human potentials, and Ross is busy upgrading the technical foundation in the labs for launching a variety of studies.

TMI in Italy (Stefano Roverso) (54:22)

The combination of NLP®, LAB Profile® and Hemi-Sync® techniques used in Life Excellence 360°, a program developed and offered by Stefano Roverso, has been shown to act in profound and beneficial ways with people. These systems can stimulate greater capacities for mental and emotional intelligence. Experiential sessions of "cerebral synchronization" during deep meditative states are alternated with group and individual work.
